Made in Poland

Our company was born out of fascination with light. For 33 years of running our business, we have gained knowledge and competences, thanks to which we can design and manufacture even the most complex lighting systems. We provide technologically advanced solutions in the field of Architectural, Office & Industrial Lighting.

We make sure that our products are distinguished not only by the best parameters, but also by unique design. We believe that the space that surrounds us has a real impact on our well-being. This idea guide us throughout the creation of our products. We offer high-tech solutions and constantly invest in the development of our research centre and state-of-the-art production lines. We develop dynamically with the advancement of technology.

Design

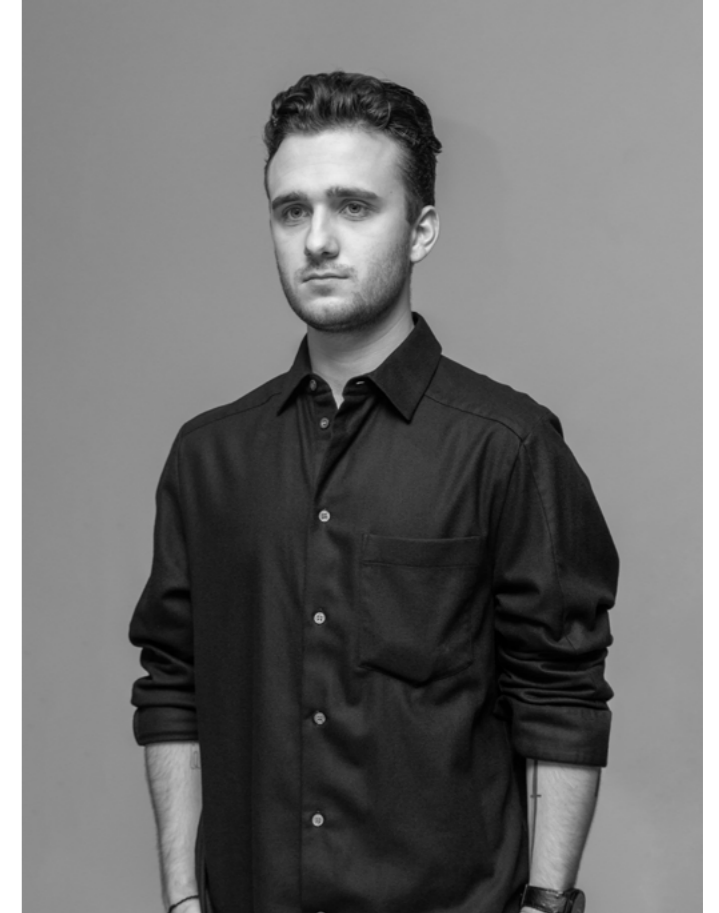

The Sizzano family of luminaires is a composition of classic, eye-catching oval shapes combined with a modern cover. These two forms taken together give an extremely interesting and elegant effect.

I created the luminaire with modern interiors in mind. It can act as a source of general lighting and also provide ambient light. In the latter case, it will provide the room with a unique atmosphere and mood.

In the design process, I paid particular attention to the quality of the selected materials and the aesthetics of workmanship. For me and the architects these aspects are equally important as the design.

Dorota Koziara will design the luminaire line for us

„The world-famous designer will create a collection of LED luminaires using a state-of-the-art generation of modules. The idea of the project is to combine the magic of light with a highly energy-saving lighting system. Cooperation with the designer is part of our strategy, in which we focus on combining innovative, pro-ecological technological solutions with top-shelf design. Dorota Koziara will design a collection of luminaires intended for various purposes, which will form a coherent design line.”

Marzena Lesińska

Management Board Representative for Marketing

„I consider light the most magical phenomenon. It brings out shapes, builds the atmosphere and allows us to explore the world we live in. The Lena Lighting brand invited me to cooperate and I am very happy that together we will create products that will help you illuminate your everyday life.“

Dorota Koziara

A designer, artist, interior architect, art director and exhibitions curator.

Our luminaires at the „Creative by nature“ exhibition during Expo 2020 in Dubai

Our energy-efficient luminaires – Baris LED, Sizzano, Solanto Duo and Sterilon Flow Premium – represents Polish design and innovation during the temporary exhibition at Expo 2020 in Dubai. The exhibition, whose artistic director is Dorota Koziara, includes products from 21 Polish companies, including 4 luminaires from our portfolio.

Baris LED

DESIGN: Michał Jaraczewski

Baris LED

Design

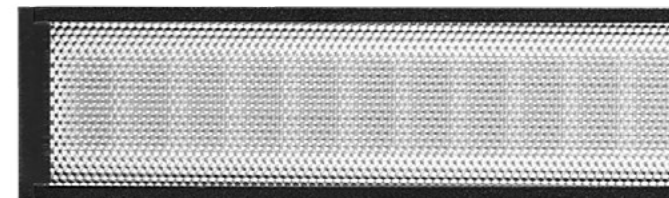

Baris is a modern luminaire. Its rectangular form is classic and it fits into any interior.

I was looking for innovation. I wanted Designers to reach for this luminaire eagerly and return to it in subsequent investments. A lot is happening here. You can order a five-meter luminaire made of one piece of aluminium, or adjust its length every 14 cm. Mount it on the surface, suspend it or hide it in the ceiling.

Choose any colour of light and decide for different optics. And with this luminaire, this is just the beginning. Baris is a modular system which, like an app, will change thanks to its customers.

Michał Jaraczewski / Designer

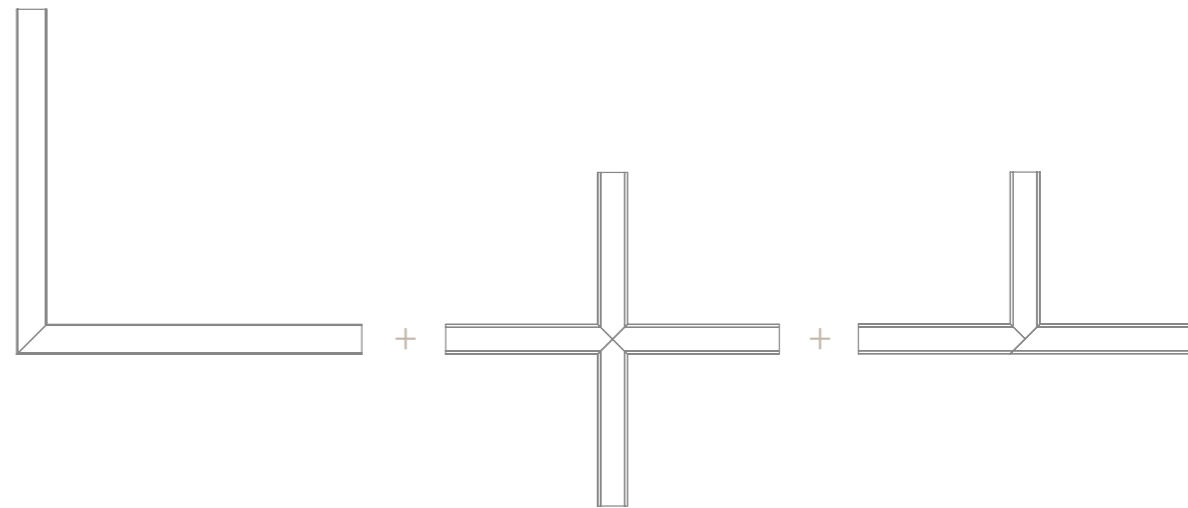

Less is more

The Baris family consists of luminaires of classic proportions and modern design. These are multi-purpose luminaires characterised by high aesthetics and excellent lighting parameters. Their orderly design will fit perfectly into any minimalistic space.

Use Your imagination

With various elements you can create a combination to suit your needs. You can decide about the shapes and dimensions of the lighting system.

Expo Adjust

DESIGN: Jakub Zarzyński

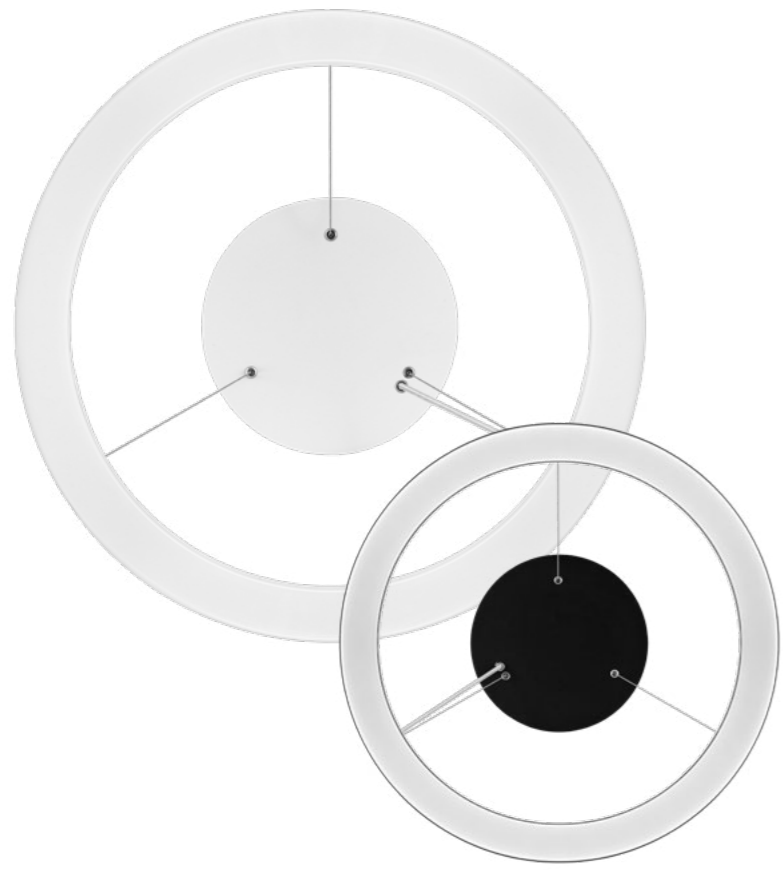

Loft

Expo Adjust is a complementary element for representative and boldly designed architectural interiors. This is why the smooth body of the luminaire is finished with a masking grid, reminiscent of the grid solutions popular in the fancy loft projects.

Solanto

DESIGN: Michał Jaraczewski

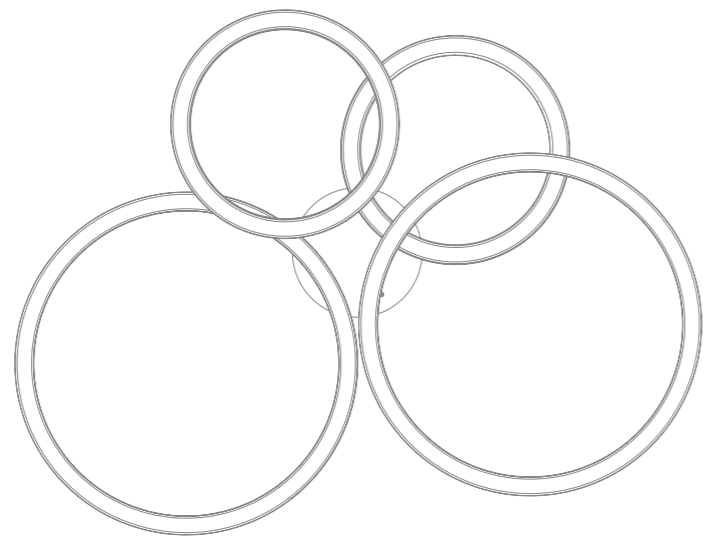

4 versions

Solanto is a family of luminaires made with high aesthetics and the highest quality of workmanship. Two available dimensions of circles, various colours and the possibility of adjusting the suspension length give the architect a wide range of arrangement options. Luminaires are dedicated to representative rooms as well as private apartments.

Quadruple suspended version

The figure shows an example of dimensioning, which changes depending on the individual system of circles.

Tiara LED

DESIGN: Our R&D team

Good design

Our energy-saving Tiara LED road luminaire won in the Green Design 2021 category in the most prestigious Polish design competition – Good Design. The Green Design 2021 award confirms that highly energy-saving technological solutions can be skilfully combined with distinctive design, also in the road lighting category.

We illuminated Greater Poland Children's Health Center in Poznan

We illuminated one of the most modern pediatric hospitals with over 7,500 led luminaries. Both inside and outside the building were installed energy-efficient lighting equipped with new generation LED modules. In total, more than 7.5 thousand led fixtures, including specialized LABO luminaries for sterile hospital rooms, as well as our flagship products. In the hospital, you will also find many striking designs: Terra, Piatto, or Arto luminaries.

INSPIRING SOLUTIONS

Santander Work Cafe

Złota 44 in Warsaw is the tallest apartment building in the European Union. We supplied it with our designer-led luminaires. This is the first branch of Santander Bank Polska in our country, which combines professional banking services with a café.

UNIQUE DESIGN

CMA conference center

To properly light the interiors, highlight African art and create the right atmosphere, we provided the CMA with nearly 1,200 energy-saving luminaires. Many of the rooms are illuminated with discreet light coming from light lines, partly hidden in the architecture of the building.

MODERN DESIGN

Zakątek Malucha nursery

The English-speaking nursery in Łochowo is a perfect example of a modern children-friendly space. The interiors of "Zakątek Malucha" delight with unique lighting arrangements created with the use of our products. Energy-saving luminaires, used throughout the building have been arranged in an extremely spectacular way.

More than energy efficient

We have designed a modern lighting system in Poznań University of Technology. It consisted of two installations that do not exceed the **total power consumption of 1kW.**

Can You imagine, that's a half the power consumption of your electric kettle?

It really matters

We make our products according to the highest environmental standards.

Being aware of the importance of environmental protection behaviours and future generations inspires us to put maximum effort into offering the highest quality, energy-efficient products; and to make sure that the entire process and technology of their production do not have a negative impact on the ecosystem.

Our efforts and their effectiveness have been confirmed by the ISO 14001 certificate. This means that Lena Lighting has successfully implemented an environmental management system. The overall goal of this system is to create conditions for the functioning of the enterprise in order to minimise the negative impact on the natural environment. We have already succeeded, but we are going to continue our journey and invest in technology and knowledge aimed at care for the natural environment.

Since 1989

We create **the light together**
