Office lighting

The best solution for your office

The minimalist and unique design has been combined with an innovative approach in the field of energy saving and solutions that increase the comfort of working and staying in artificial light. Baris 40 LED & Baris 52 LED luminaires, has been designed in accordance with the Human Centric Lighting concept, which – when it comes to lighting design – puts people and their needs first.

The opal diffuser ensures an even distribution of light, which has a significant impact on the sense of comfort and well-being. This innovative luminaires combines the most important aspects of a modern approach to lighting design – maximum energy efficiency, functionality, possibility to create individual lighting installations with user comfort.

The most important differences between 52 & 40 versions:

- Version 52 is a modular system with X,T,L,V connectors are available
- Version 52 enables the creation of light lines up to 25 meters without connections of the lampshade
- Version 52 has IP44 ingress protection class
- Version 52 enables connection the luminaire with an IoT components
- Version 40 is available as a single, autonomous luminaire and is not available in a recessed version

Impressive length of the profile without joints and the possibility to replace LED modules.

Baris 52 LED

Baris 52 LED is an intelligent, energy-saving luminaire allowing for original lighting arrangements in offices and representative rooms.

Equipped with an ergonomic assembly system, it allows you to create as many as 6 meters of light lines without the need to join the profile and the diffuser, and to compose virtually unlimited strings as well as simple shapes and figures.

The luminaire's great advantage is its energy efficiency. It features the highest-class LED modules and intelligent solutions limiting electricity consumption.

25 m

More option with IoT

The luminaire's profile is compatible with intelligent IoT modules, which also allows to optimise the provided level and amount of light.

Easy replacement

The luminaire's modularity allow the replacement of electronic components such as the LED strip, power supply and the diffuser.

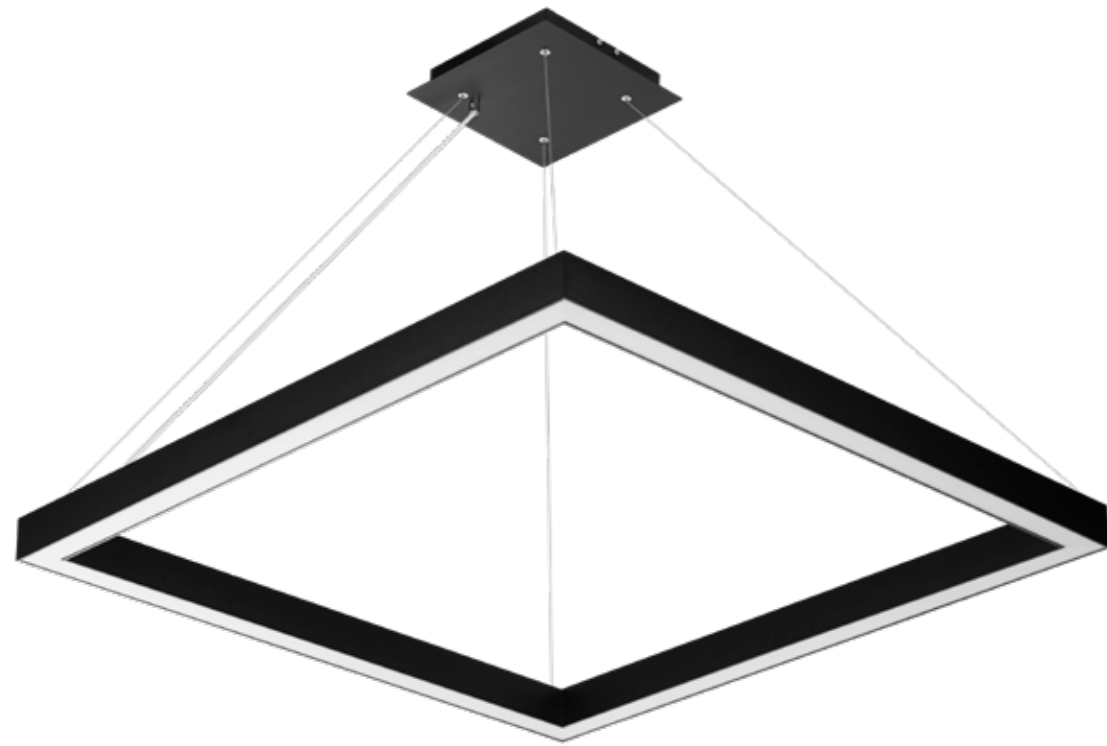

Convenient installation

Convenient plastic clips connecting the lighting system with the luminaire's aluminum profile.

Dedicated flexible diffuser

A dedicated flexible edge of the diffuser allows for IP44 tightness and up to 25 meters of uniformity of the diffuser.

IN HARMONY WITH A MODERN, PURISTIC DESIGN

The type of lighting and its area of application requires appropriate selection of parameters in the design process. When designing two seemingly different lamps with different lighting parameters and different functionalities, we had in mind their combined use in different rooms of the same building.

One family – various parameters and dedicated applications.

Quick mounting system & excellent parameters

SQ 600 LED is a modern line of ceiling luminaires designed from scratch, recommended particularly for office spaces, spacious corridors and public utility areas. A special lens system ensures uniform lighting and even illumination of the diffuser surface. The PRM diffuser allows for reducing the glare effect. The great advantage of SQ 600 LED is its easy mounting and service. Due to the low weight and the diffuser's click-in system, the mounting of the luminaire is quick, efficient and tool-free.

SQ 300 LED is a new line of square bulkhead luminaires, which can be used in smaller rooms and in corridors. The plastic body ensures low weight and high impact resistance (IK08). The diffuser made of PS polystyrene provides excellent lighting properties. A special lens system ensures uniform lighting and even illumination of the diffuser surface. The SQ 300 LED luminaire is available in versions with the RCR motion sensor and DIMM DALI control.

Light source:	LED module	Material of the body:	aluminium
Nominal power range [W]:	30 - 54	Colour of the body:	white
Luminous flux range [lm]:	3000 - 5700	Diffuser material:	PS
Colour temperature [K]:	3000, 4000	Diffuser type:	OPAL, PRM, PMMA
Mounting version:	recessed, surface	Dimensions A/B/C [mm]:	595/595/9, 620/620/9, 1195/295/9

Features:

- Elegant, simple design
- Low slim profile
- Low weight
- Rectangular and square versions
- UGR<19 versions

Madera 3 LED

max. 123 lm/W IP44 IK07 |

Light source:	LED module	Material of the body:	powder coated steel
Nominal power range [W]:	15 - 41	Colour of the body:	grey, white, black
Luminous flux range [lm]:	1800 - 5200	Diffuser material:	PS
Colour temperature [K]:	3000, 4000	Diffuser type:	PRM, OPAL
Mounting version:	surface	Dimensions A/B/C [mm]:	1170, 310, 480, 620/350, 310, 620, 480, 350/68

Features:

- Minimalist design
- Comfortable soft light and low glare
- Available in several colours
- Multitude of versions available in different sizes & colours
- High uniformity of light SDCM ≤3

Compact LED Evo

— Dostępna wersja „Solid” ze stalową obudową

max.
142 lm/W IP65/IP20 IK07 I, II

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	24 - 60	Colour of the body:	white
Luminous flux range [lm]:	2750 - 8100	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	OPAL, PRM
Mounting version:	recessed	Dimensions A/B/C [mm]:	620/620/66-69

Features:

- Compact, classic design
- Lightweight and robust ABS body
- Diffuser: OPAL (soft light), PRM (low glare)
- Large family of products
- Low weight
- High luminous efficiency

Compact LED Evo IP65

max.
142 lm/W IP65 IK07 I, II

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	24 - 60	Colour of the body:	white
Luminous flux range [lm]:	2750 - 8100	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	OPAL, PRM
Mounting version:	surface	Dimensions A/B/C [mm]:	620/620/66

Features:

- Compact, classic design
- Lightweight and robust ABS body
- Diffuser: OPAL (soft light), PRM (low glare)
- Large family of products
- High uniformity of light SDCM ≤3
- Low weight

Compact LED Evo 1200 IP65

max.
117 lm/W IP65 IK07 |

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	25 - 58	Colour of the body:	white
Luminous flux range [lm]:	2900 - 7000	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	OPAL
Mounting version:	surface, recessed	Dimensions A/B/C [mm]:	1195/250/69

Features:

- Low weight
- Classic design
- High impact resistance

Compact LED Evo 1200

max.
131 lm/W IP65/IP20 IK07 |, ||

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	25 - 58	Colour of the body:	white
Luminous flux range [lm]:	2900 - 7000	Diffuser material:	PS, PC
Colour temperature [K]:	3000, 4000	Diffuser type:	OPAL, nPRM
Mounting version:	surface, recessed in modular ceiling	Dimensions A/B/C [mm]:	1195/250/66-69

Features:

- Compact, classic design
- Lightweight and robust ABS body
- Diffuser: OPAL (soft light), PRM (low glare)
- Large family of products
- High uniformity of light SDCM ≤3
- Low weight

Tablo LED

max. 130 lm/W IP20 |

Light source:	LED module	Material of the body:	powder coated steel
Nominal power range [W]:	35 - 70	Colour of the body:	white
Luminous flux range [lm]:	4300 - 10050	Diffuser material:	n/d
Colour temperature [K]:	3000, 4000	Diffuser type:	n/d
Mounting version:	suspended, surface	Dimensions A/B/C [mm]:	1435/85/60

Features:

- Asymmetrical light distribution
- Robust metal body
- Uniform illumination of objects without light reflections
- Dedicated mostly for schools, universities, museums and art galleries.

Labo LED

max. 81 lm/W IP65 IK07 |,II

Light source:	LED module	Material of the body:	powder coated steel
Nominal power range [W]:	32, 48	Colour of the body:	white
Luminous flux range [lm]:	2850 - 4400	Diffuser material:	PC
Colour temperature [K]:	4000	Diffuser type:	OPAL, transparent
Mounting version:	suspended, surface	Dimensions A/B/C [mm]:	595/595/50, 595/595/70

Features:

- Meets high requirements
- Solid steel powder-coated body
- Very high ingress protection
- Optics: HE (limited glare) or OPAL (soft light) reflector
- Option: Ra>90
- Shatterproof diffuser
- Glare-reducing louvre luminaire

BECAUSE LESS IS MORE MEET SQUARE AND ROUND

RQ 100/160/200 and SQ 160/100 are energy-saving downlight luminaires with excellent lighting parameters. Modern design, small dimensions and low weight allow them to be used and create comfortable atmosphere in any office space, in representative and spacious corridors, as well as in small rooms

One family - two versions of mounting: surface and recessed.

The classic shape and compact size

RQ 100/160/200 and SQ 160/100 are a new line energy-saving downlight luminaires, introducing modern solutions that ensure excellent lighting parameters. Their Polish origin is a guarantee of quality.

The classic shape and compact size allow it to be used in various types of rooms, with different purpose and level of representativeness. Downlight luminaires are available in three variants: with a matt, prismatic and opal diffuser. It allows for choosing the appropriate light distribution angle, and thus for obtaining the appropriate amount of light on a given surface.

Modern design, small dimensions and low weight allow them to be used and create comfortable atmosphere in any office space, in representative and spacious corridors, as well as in small rooms.

RQ 200 LED

max.
138 lm/W IP65/IP20 IK07 |

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	17, 19, 22, 24	Colour of the body:	white
Luminous flux range [lm]:	1800 - 3300	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	MAT, PRM
Mounting version:	surface, recessed	Dimensions A/B [mm]:	ø221/51, ø227/86

Features:

- Low weight
- Homogeneous body (without additional surface-mounted boxes)
- Polish product
- 2 types of diffuser with different optics

SQ 160 LED Plus

max. 117 lm/W IP33 IK08 I, II

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	17	Colour of the body:	white, black mat
Luminous flux range [lm]:	1700 - 2200	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	MAT, PRM, OPAL
Mounting version:	surface	Dimensions A/B/C [mm]:	162/162/86

Features:

- Low weight
- 3 types of diffuser with different optics
- Polish product
- Homogeneous body (without additional surface-mounted boxes)

SQ 160 LED Plus

max. 132 lm/W IP44/IP20 IK08 I, II

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	17, 21	Colour of the body:	white
Luminous flux range [lm]:	1700 - 2900	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	MAT, PRM, OPAL
Mounting version:	recessed	Dimensions A/B/C [mm]:	158/158/78

Features:

- Low weight
- Clip for ergonomic assembly
- Polish product
- Increased ingress protection
- 3 types of diffuser with different optics

RQ 160 LED Plus

max. 117 lm/W IP33 IK08 II

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	17	Colour of the body:	white
Luminous flux range [lm]:	1700 - 2200	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	MAT, PRM, OPAL
Mounting version:	surface	Dimensions A/B [mm]:	ø166/86

Features:

- Low weight
- Homogeneous body (without additional surface-mounted boxes)
- Polish product
- 3 types of diffuser with different optics

RQ 160 LED Plus

max. 95 lm/W IP44/20 IK10 I

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	17, 21	Colour of the body:	white
Luminous flux range [lm]:	1700 - 2900	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	MAT, PRM, OPAL

Swing LED Evo

max. 127 lm/W IP40/IP20 |

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	8 - 29	Colour of the body:	white
Luminous flux range [lm]:	850 - 3000	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	PRM
Mounting version:	recessed	Dimensions A/B [mm]:	ø178/163

Features:

- Unconventional design
- Modern, elegant design
- Frameless design
- Wide range of light distribution: 65°, 25°, 59°/92°
- Light vertical adjustment up to 30°
- Light horizontal adjustment up to 355°

DL 220 LED Evo

max. 130 lm/W IP65/IP40 IK08 |,II

Light source:	LED module	Material of the body:	ABS
Nominal power range [W]:	10 - 28	Colour of the body:	white
Luminous flux range [lm]:	1350 - 3450	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	PRM MAT, PRM
Mounting version:	recessed	Dimensions A/B [mm]:	Ø220/68

Features:

- High luminous efficiency
- Very high ingress protection
- Prismatic or matt-prismatic diffuser
- Easy assembly
- High impact resistance
- Low weight

DLN 220 LED Evo

max. 122 lm/W IP65 IK08 |

Light source:	LED module	Material of the body:	powder coated steel + ABS
Nominal power range [W]:	10 - 28	Colour of the body:	grey, black
Luminous flux range [lm]:	1450 - 3450	Diffuser material:	PC
Colour temperature [K]:	3000, 4000	Diffuser type:	PRM MAT, PRM
Mounting version:	surface	Dimensions A/B [mm]:	ø220/140

Features:

- Robust metal body
- High impact resistance
- Very high ingress protection
- Polish product

Nectra LED Plus

max. 126 lm/W IP44 IK08 |,II

Light source:	LED module	Material of the body:	PC, aluminium
Nominal power range [W]:	5 - 25	Colour of the body:	white, black
Luminous flux range [lm]:	500 - 3450	Diffuser material:	PMMA
Colour temperature [K]:	3000, 4000	Diffuser type:	OPAL
Mounting version:	recessed	Dimensions A/B [mm]:	ø121/67, ø170/69, ø222/70

Features:

- Increased ingress protection
- Easy assembly
- Low weight
- Branded components with external power supply
- Large modification possibilities to adapt to the needs

New definition of standard bulkhead

Dione LED it is a product that meets the highest standards possible – impeccable aesthetics, excellent lighting parameters, subtle profile, solid and durable materials, very high tightness. Plus a number of innovative functional solutions enabling much faster mounting. These are the aspects that give Dione LED a competitive advantage.

This lamp also comes in a version with asymmetrical distribution. Dione Plus LED Asymmetric will prove great in places where it is important to partly illuminate the surface, e.g. passageways, stairs, setbacks, other environmental details, whose visibility is important for the purpose of safety or design.

Asymmetrical distribution allows to illuminate a given area. In addition, it offers unlimited possibilities to create room ambience, while maintaining perfect lighting parameters.

Dione LED family

71%

Faster mounting of Dione
compared to a traditional bulkhead

The Dione line of luminaires incorporates the combination of high-quality components and guarantees compliance with all electrical and lighting standards. It is characterised by a high luminous flux, which enables installing a relatively smaller number of luminaires in a room, ensuring the required proper level of lighting.

And the installation and service process itself is fast and efficient thanks to numerous improvements. This is made possible, among other things, by features such as the diffuser suspension system, the quick-connect coupling and the „click in“ system for clicking on the diffuser.

This allows the investor to save money during the investment – when purchasing the luminaires and during their use. Dione LED is a new generation luminaire.

Integrated LED panel

The solution ensures safety of the lighting module, eliminating the exposure of LEDs to their accidental damage.

Quick connector

Facilitates the assembly process, no additional tools are needed. Durable hinge allows to hang the diffuser with the LED module.

High quality driver

Regardless of the product line, the drivers used are characterised by the highest quality and technical parameters.

Easy access to the connector

It helps connect the luminaire with basic tools. Smart locations of cable lead-ins.

GUESS WHAT ELSE CAN A LAMP DO FOR YOU?

Capella LED is an ideal choice even for the most demanding and representative investments. Design engineers from the Lena Lighting Development Department have created a lamp which can perform the most sophisticated functions. The design allows you to integrate it with the drivers of various suppliers and adjust them to future technological solutions.

Discover dozens of possibilities with smart lamps IoT ready.

You decide what you need

Thanks to the possibility of controlling it, equipping its luminaires with devices which are components of other systems as well as a very wide range of design, this luminaire provides unlimited options for designers and architects. Capella LED is an ideal choice even for the most demanding and representative investments.

Designers of the Capella LED lamp predicted solutions which are currently not available on the market and which are at the stage of designing. The design allows you to integrate it with the drivers of various suppliers and adjust them to future technological solutions.

The multitude of versions and functionalities of this lamp implies a variety of applications—from passageways, lobbies, public spaces, through restaurants, reception areas, hotels, gyms, offices, sales points, apartments, to residences.

Mounting version:	surface	Dimensions A/B/C [mm]:	85/160/45

Features:

- Very durable construction
- Modern lenticular diffuser
- Easy assembly
- Duct luminaire
- High ingress protection
- Increased impact resistance

Intelligent light management system

CLUE IN

Properly adjusted light improves the comfort of life, efficiency and employees' safety, as well as the cognitive abilities of students. From work and education, through relaxation and fun.

System's scalability allows Clue In to be applied regardless of the size of the facility. It will prove perfect in one room, as well as in the entire building complex.

No need for overhauls, cutting into walls or cabling. Easy access via application installed in your smartphone enables to see the world in a better light.

Clue In can be used in both open space office areas and in individual offices. It will prove perfect in conference rooms, passageways, reception areas, lobbies and social rooms.

Human Centric Lighting

— DALI / DALI 2

DALI (Digital Addressable Lighting Interface) is a fully digital communication protocol enabling communication between the installation's end components (luminaires) and the control system, regardless of the applied technological solutions. It allows to build complete lighting systems based on components from any manufacturer.

— Internet of things - IoT

Uniquely identifiable items can directly or indirectly collect, process or exchange data via an electrical installation or intelligent KNX, or a computer network, or a dedicated DALI network. The system enables remote control via mobile devices and is compatible with existing BMS systems, such as KNX. It is also possible to control larger facilities/installations using an enhanced interface via the PC Platform. Thanks to this solution, it is possible to control the peripherals of building automation.

— Corridor function

The basis for the operation of a dual-beam luminaire (equipped with the so-called corridor function) is the use of a two-circuit track or a dimmable driver in combination with a motion sensor. In both cases the luminaire works, for example, in a 10/100 system. When the luminaire is at rest, it constantly emits 10% of the nominal flux value, and when it detects movement, it smoothly switches into 100% mode. The corridor solution is especially useful in places, where constant minimal illumination of the monitored surface is required.

— DIMM 1-10V control

Most LED luminaires can be equipped with a dimmable DIMM 1-10 V power supply. The wide possibilities offered by modern LED modules can be exploited to their full capacity, if the luminaires are connected to the 1-10V CONTROL analogue lighting control system. This solution allows you to control each individual luminaire or a group of luminaires and maximise savings without any adverse effects on LED modules' durability.

— PIR - Passive infrared sensor

Directional, passive infrared sensor allowing precise control of lighting. Works in a specific area minimising the number of false alarms (excitations). The sensor allows to adjust illuminance (day-night identification), length of working time (switch off delay) and effective range of operation (distance from sensor and detection area). In addition, it allows you to indicate the monitored direction of detection. It allows to adjust the luminaire's operation mode to save up to 90% of the energy consumed.

— Tunable white

Tunable White (Human Centric Lighting) is a technology that allows the user to control the colour (colour temperature) and luminous flux of a single or group of luminaires, reflecting the natural light whose colour and intensity changes over the day. The Human Centric Lighting system, which uses Tunable White luminaires, also allows luminaires to adapt to current needs and activities, regardless of the time of day. There are two types of LEDs in the luminaire and the DALI bus, prompted via the touch panel or application, controls the colour and luminous flux. Manual control is possible or scenes can be pre-set.

— Radio motion sensor

Active microwave sensor invisible from the outside, allowing more efficient use of lighting – it reduces energy consumption and the corresponding costs of energy. It provides intelligent lighting control and allows you to maintain high luminaire tightness (installation inside the luminaire). Using the sensor does not affect the lifespan of the LED panels. The sensor allows to adjust illuminance (day-night identification), length of working time (switch off delay) and effective range of operation (detection field radius). It allows to adjust the luminaire's operation mode to save up to 90% of the energy consumed. RCR sensors are also available in the Bluetooth version and are used in corridor systems, offering smooth brightening after motion detection and the daylight harvest function. It is possible to purchase the sensor in a standalone version or as a component.

— Lighting control system

It allows you to reduce energy consumption by using daylight and automatic switching the light off in the absence of people. The system includes three highly advanced miniature sensors linked to a controller using a set of predefined modes. The lighting control system uses the DALI protocol, developed with the purpose of simplicity of use and providing energy efficiency up to 75%. The light sensor works in the band of visible light (perceived by the human eye), automatically adjusting the level of artificial lighting to the intensity of daylight without causing any visual discomfort for the people remaining inside the room. The motion sensor precisely detects the movement of people. It works in conjunction with the delay function to ensure optimal lighting performance in offices.

UV-C Sterilon Flow Premium

IP20 |

Standard and budget Mono version available

Light source:	UV-C ultraviolet tube
Type of disinfection:	safe air disinfection
Maximum airflow [m ³ /h]:	200 for 144W, 160 for 72W
Maximum area of disinfection:	40 m ² (120m ³) for 144W 25 m ² (75m ³) for 72W
Total power consumption [W]	155 for 144W, 85 for 72W

Power cord [m]:	3
Filters:	dust filter
Colour of the body:	white/silver, black/gold
Light source lifespan [H]:	9000
Dimensions A/B/C [mm]:	724/160/220 for 144W 724/160/160 for 72W

Features:

- Airflow control
- Great design
- High efficiency
- Multiple mounting options and accessories

Application of UV-C Sterilon Flow Premium.

UV-C Sterilon Square PP

IP20 |

Light source:	UV-C ultraviolet tube	Power cord [m]:	n/a
Type of disinfection:	safe air disinfection	Filters:	dust filter
Maximum airflow [m ³ /h]:	120	Colour of the body:	white
Maximum area of disinfection:	30 m ² (90 m ³)	Light source lifespan [H]:	9000
Total power consumption [W]	72	Dimensions A/B/C [mm]:	595/595/70

Features:

- Safe & quiet
- Easy mounting
- Surface, suspended and recessed mounting
- The luminaire is equipped with time counter used for indicating the consumption of UV-C tubes

Application of UV-C Sterilon Square PP in school classroom.

UV-C Sterilon Square Hepa

IP20 |

— More advanced Hepa 2 version available

Light source:	UV-C ultraviolet tube	Power cord [m]:	n/a
Type of disinfection:	safe air disinfection	Filters:	dust filter, HEPA
Maximum airflow [m ³ /h]:	200m ³	Colour of the body:	white
Maximum area of disinfection:	70m ²	Light source lifespan [H]:	9000
Total power consumption [W]	178	Dimensions A/B/C [mm]:	595/595/158

Features:

- Highly efficient air disinfection
- Compact dimensions and easy installation
- Recessed mounting
- HEPA H13 filter and charcoal filter or F7 filter and charcoal filter
- Device equipped with an LED operating time counter for indicating consumption of the UV-C fluorescent lamps

UV-C Sterilon Max

IP20 |

Light source:	UV-C ultraviolet tube	Power cord [m]:	4
Type of disinfection:	safe air disinfection	Filters:	dust filter, HEPA H13, carbon
Maximum airflow [m ³ /h]:	1500m ³	Colour of the body:	white-graphite, black
Max. noise level [db]	~37	Light source lifespan [H]:	9000
Total power consumption [W]	288 W	Dimensions A/B/C [mm]:	1915/650/650

Features:

- Very high airflow
- Single dose of 90 J/m² to 100 J/m²
- For large spaces
- Safe for people and animals
- The possibility of printing graphics to the body

It really matters

We manufacture according to the highest environmental standards

In recent years, we have continued and deepened our growing commitment to promoting an eco-friendly attitude towards business. Being aware of the importance of environmental protection behaviours and future generations inspires us to put maximum effort into offering the highest quality, energy-efficient products; and to make sure that the entire process and technology of their production do not have a negative impact on the ecosystem.

Our efforts and their effectiveness have been confirmed by the ISO 14001 certificate. This means that Lena Lighting has successfully implemented an environmental management system. The overall goal of this system is to create conditions for the functioning of the enterprise in order to minimise the negative impact on the natural environment. We have already succeeded, but we are going to continue our journey and invest in technology and knowledge aimed at care for the natural environment.
